

PRESS RELEASE

Open Air UAV Flight Training expands its service delivery network

Shediac, June 28, 2018 – Open Air UAV Flight Training is proud to announce its latest partnership with Okanagan Drone Productions, a video production company based in Vernon, British Columbia. Open Air UAV Flight Training is a Canadian leader in the field for unmanned aerial vehicles (UAVs) training. Open Air offers a combination of on-location and online UAV training courses to all users, from beginners to already qualified operators, on the exponentially growing beneficial usage of light UAVs within visual line of site.

‘Our mission at Open Air UAV Flight Training is to efficiently educate everyone eager to learn about all aspects of the UAV world for the collective greater goods’, said Gilles Daigle, Operating Manager at Open Air. ‘This new partnership with Okanagan Drone Productions in British Columbia allows us to enhance our focus on excellent customer service by providing on-location training to a broader audience on a much larger territory, through another reputable affiliate partner. The experience and track record of Okanagan Drone Productions are noteworthy. We are delighted to add Okanagan Drone Productions to our family’, added Daigle.

‘As a member of The MEDIA21 Group of companies, we already have access to dedicated and experienced professionals to work with a broad range of clients from the inception to the marketing of their finished project. And now, our affiliation with Open Air UAV Flight Training will also us to expand our service offerings to clients’, said Warren Palmer, Project Manager at Okanagan Drone Productions. ‘We are also very pleased to join the Open Air UAV Flight Training family’, concluded Palmer.

The interest in the beneficial use of UAVs is on the rise with increasing deployments by several countries around the world. The market for commercial drones, also called commercial UAVs, is expected to reach 13 billion U.S. dollars by 2025. The commercial UAV production for mini-UAVs is currently valued at 58.4 million U.S. dollars. Thus, UAV pilots and sensor operators are in high-demand as UAV technology and its applications continue to grow in a broad range of industries.

With the addition of Okanagan Drone Productions as a partner, Open Air UAV Flight Training offers on location services from coast-to-coast, with points of service in... (PEI, NB, The Prairies and now British Columbia).
